SUMMARY

Computer Science student at UMass Boston (Expected May 2027) with hands-on experience building and shipping full-stack and iOS applications. Proficient in Python, JavaScript, Swift, React, Flask, and AWS. Experience leading technical instruction for 40+ students and building real-time production apps with Firebase, SwiftUI, and REST APIs.

EDUCATION

University of Massachusetts Boston Boston, MA

B.S. Computer Science | GPA: 3.4/4.0 | Expected May 2027

Coursework: Computer Architecture & Organization, Data Structures & Algorithms, Systems Programming

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C, C++, Swift

Frameworks & Tools: React, Flask, SwiftUI, Node.js, HTML/CSS, Git, Docker, Firebase, AWS (S3, EC2, Lambda)

Databases & Testing: SQL, PostgreSQL, Jest, Pytest

APIs & Concepts: REST APIs, AI/LLM APIs, Agile/Scrum, CI/CD

Leadership/Experience

Computer Science Club — UMass Boston Boston, MA

Member & Peer Tutor 2025 – present

- Tutored fellow CS students in core topics including data structures, algorithms, and systems programming.
- Participated in coding workshops and Leetcode-focused interview prep sessions, sharpening problem-solving skills in algorithms and time complexity.
- Attended regular club meetings and collaborative coding events to stay engaged with the broader CS community on campus.

Teaching Assistant — UMass Boston Boston, MA

CS 110 intro to programming Fall 2024

- Led weekly lab sessions/office hours for 40+ students, debugging code and explaining core Python concepts (loops, functions, data structures)
- Graded assignments and provided feedback on 40+ submissions per week

HackUmass — Amherst, MA

AI Hackathon 2024 – 2024

- Competed in a team-based AI hackathon, placing in the top 30 out of all participating teams

PROJECTS

Luvly — Couple Connection App

github.com/rickybr34/Luvly-Demo

Swift, SwiftUI, Combine, MVVM

- Designing and building a full-featured iOS relationship app with real-time partner notifications, interactive quiz games (Never Have I Ever, This or That, Who's More Likely To), daily questions, and anniversary countdown.
- Designed using MVVM pattern with Combine and ObservableObject for reactive state management across shared partner data.
- Implemented a topic-based quiz system with smart filtering, progress tracking, and a multi-step onboarding flow with secure 6-digit partner pairing codes.

MunchMatch — Group Restaurant Decision App

github.com/rickybr34/MunchMatch-showcase

Swift, SwiftUI, Firebase, Google Places API | In Development

- Building a real-time iOS app where groups create shared rooms, set food preferences, and swipe Tinder-style on nearby restaurants via Google Places API to reach a group consensus.
- Implemented Firebase Realtime Database for live room sync, Firebase Authentication for user identity, and push notifications for session updates.
- Targeting TestFlight release with crash reporting and analytics integrated for stability ahead of App Store submission.

Personal Portfolio Website

github.com/rickybr34/websiteportfolio

React 19, JavaScript, Tailwind CSS, Vite, Framer Motion, Vercel

- Built and deployed a responsive portfolio using React 19 and Vite, with animated UI components powered by Framer Motion and client-side routing via React Router.
- Deployed on Vercel with GitHub-integrated CI/CD; integrated a backend contact form with email handling.
